EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dan C. Hu (*Reg. #40,025*) on March 30, 2006.

2. The application has been amended as follows:

3. **IN THE SPECIFICATION**

Please delete paragraph [0001] and replace it with the following paragraph:

--[0001] This application is related to U.S. application Ser. No. 09/967,615, entitled "PXE Server Appliance," by James F. Frye, Jr., filed on Sep. 29, 2001, now abandoned, which is incorporated herein in its entirety for reference.--

4. **IN THE CLAIMS:**

Please cancel claims 49 and 58.

Please amend the following claims:

47. An article comprising a storage containing software that when executed causes an embedded operating system (OS) based computer to:

receive a request from a target server for remote booting of the target server; and
in response to the request, send a program and address information of a boot server to the target server, wherein the boot server is separate from the embedded operating system (OS) based computer,

wherein the program when executed causes the target server to issue a boot server request to the boot server for a boot image to download to the target server, the boot image containing code to install at least one of an operating system and application software on the target server.

48. The article of claim 47, wherein the software when executed causes the embedded operating system (OS) based computer to further:

receive the boot server request; and

in response to the boot server request, issue a Trivial File Transfer Protocol (TFTP) request to the boot server for the boot image.

50. The article of claim 47, wherein the embedded operating system (OS) based computer comprises a handheld computer.

51. The article of claim 47, wherein the embedded operating system (OS) based computer receives the request from the target server by wireless communications.

53. A computer comprising:

a processor;

an embedded operating system (OS) executable on the processor;

software executable on the processor to:

receive a request from a target server; and

in response to the request, send information to the target server to direct the target server to a boot server separate from the computer for downloading a boot image from the boot server to the target server for remote booting of the target server,

wherein the information sent to the target server comprises a netboot program and an address of the boot server,

wherein the computer is a reduced-capability computer having less capability than a server computer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
